This document provides technical specifications for IT directors, procurement officers, and accessibility coordinators evaluating **Renzulli Learning**. It covers our SaaS architecture, integration capabilities, accessibility commitments, hosting infrastructure, device compatibility, and security and privacy program. For data-protection details, see our [Privacy Policy](#) and [Data Security and Privacy Plan](#).

1. Platform Overview

Renzulli Learning is an Internet-based Software as a Service (SaaS) platform. It is an online teaching tool that provides personalized learning for K-12 students, helps teachers save time and instruct more effectively, enables educators to easily differentiate instruction, and leverages student motivation to achieve enhanced academic performance.

Key technical characteristics

- Online learning tool accessed through the Internet and a standard web browser.
- Does not require software installation, downloads, or software maintenance fees.
- Supports all grade levels, Pre-K through 12; more than 13,000 activities carry correlations to state and instructional standards.
- Implementable using your institution's existing technology infrastructure.
- Multiple professional development options including a [free on-demand course \(9 UConn contact hours\)](#) and [onsite and online customized training](#).
- LMS integration available through SAML and other standard protocols.

2. Implementation

Our dedicated team of experts supports each implementation from kickoff through full rollout. The team works with you to set up an implementation plan, timetable, and desired goals to optimize your success.

For implementation inquiries: [+1 \(203\) 680-8301](tel:+12036808301) or info@renzullilearning.com.

3. SSO & Rostering

Our support team integrates with your Single Sign-On (SSO) platforms or provides templates to transfer data into Renzulli Learning. Renzulli Learning has integrated with the following SSO solutions:

Clever	ClassLink	OneRoster
--------	-----------	-----------

Single sign-on is also available through SAML 2.0 and Google sign-in.

Renzulli Learning Templates

Custom data integrations are also available. Our experienced IT development team builds custom integration solutions to support clients and their students. The Student Registration Upload Template is available — review the Directions tab and complete the required fields to begin.

For SSO integration requests or template access, contact info@renzullilearning.com.

4. Accessibility

Accessibility Conformance Reports (VPAT® 2.5)

Our current reports document conformance with **WCAG 2.0, 2.1, and 2.2, Levels A and AA**, and the **Revised Section 508** standards.

- **Main Site, Teacher Site, and Manager Site** (May 2026): [download the report \(PDF\)](#)
- **Student Site** (May 2025): [download the report \(PDF\)](#)

Full conformance tables: [VPAT Accessibility Conformance Reports](#)

Renzulli Learning is committed to accessibility, diversity, and inclusion, and works to ensure its digital properties are accessible to all individuals, regardless of ability. We design, develop, and test our websites and online services against the W3C [Web Content Accessibility Guidelines \(WCAG\)](#), the standard school districts and other public entities use to meet their accessibility obligations.

If you have difficulty accessing any part of our sites, or need information in an alternative format, contact info@renzullilearning.com or [+1 \(203\) 680-8301](tel:+12036808301).

5. Hosting Infrastructure

Renzulli Learning uses colocation, managed, and hosted services powered by **LightEdge Solutions**. Our production environment runs in LightEdge's Austin, Texas data center, with encrypted backups in its Kansas City, Missouri data center, and LightEdge's controls are audited annually under SOC 2 Type 2.

LightEdge Solutions — leader in colocation and private cloud services for highly regulated organizations, with 25 years in business.

LightEdge owns eleven purpose-built data centers across the United States and offers full-stack technology services that deliver uptime, security, and flexibility for their clients. LightEdge's premier colocation, cloud, disaster recovery, and security solutions are designed to support complex hybrid IT deployments and are audited against the industry's top security and compliance standards.

6. Device Compatibility

To ensure optimal performance, we recommend using the most up-to-date versions of your operating system, browser, and applications. Renzulli Learning supports a wide range of devices through our applications and web browsers, including but not limited to:

- Chromebooks running the latest version of Chrome OS.
- All computers that can run the latest version of Google Chrome.
- iOS devices (iPhone, iPad, iPod touch) running the latest or immediately preceding major version of iOS / iPadOS.
- Mac devices using the latest or immediately preceding major version of macOS with the Safari browser.
- Android handheld devices running the latest or immediately preceding major version of Android.

We always recommend using the most recent version of our application available for your device. Many other devices can also be used with their built-in web browsers. For specific device compatibility inquiries, contact our support team at info@renzullilearning.com.

7. Security & Privacy

Renzulli Learning takes great care to protect non-public information provided by our customers. Renzulli Learning may have access to non-public information from multiple sources that include:

- Direct use of one of Renzulli Learning's hosted applications.
- Direct transfer from a customer's designated service representative or indirect transfer via batch data uploads.
- Transactional activities as information is updated or processed by a Renzulli Learning hosted application, or through data maintenance activities.
- Other sources as defined by one of our solutions.

Defense-in-Depth Strategy

Renzulli Learning has implemented a defense-in-depth strategy to protect non-public information. This strategy is based upon best practices designed to comply with applicable laws and regulations and is grounded in widely accepted industry standards. Our security management system is based on the following:

- **Security Policies:** All employees are responsible for the security of non-public information and follow practices defined within our Information Security Management System.
- **Information Security Organization:** Renzulli Learning management is committed to security and has established an organization responsible for the security of non-public information.

- **Asset Management:** All assets are strictly controlled and all information is classified to determine the appropriate controls required for access and handling.
- **Human Resources Security Practices:** In the U.S., Renzulli Learning conducts a comprehensive background check and screening at the time each employee is hired and requires that employees maintain familiarity and compliance with security responsibilities. When employees leave, a formal process removes their physical and virtual access to the Renzulli Learning infrastructure.
- **Physical and Environmental Security:** Critical components are hosted in LightEdge data centers, which secure infrastructure with card and biometric access controls and limit access to secure locations based on job function.
- **Communication and Operations Management:** Renzulli Learning has implemented strong operational procedures to protect information. Our controls surrounding system planning, protection from malicious code, backup processes, network security, media handling, and exchange of information are constantly analyzed and monitored to ensure they provide reasonable protection for your data. Third-party service providers with access to confidential information are required to adhere to security and privacy requirements that are consistent with and at least as restrictive as Renzulli Learning's own policies and procedures.
- **Change Management:** Renzulli Learning maintains a change management system to ensure controlled implementation of changes. All changes require both a risk analysis and a peer review before being implemented in Renzulli Learning infrastructure.

8. Privacy & Terms of Service

Our complete privacy and legal documentation:

- [Privacy Policy](#) — how we collect, process, and protect personal information; COPPA, FERPA, and applicable state and international privacy laws.
- [Terms of Service](#) — acceptable use, disclaimer of warranties, limitation on liability, dispute resolution, DMCA compliance.
- [Data Security and Privacy Plan](#) — technical and operational measures for data integrity, confidentiality, and availability, with focus on student data privacy regulations.
